"Did you know there are only 2 ozs of a difference between the sizes of Taylor bowls? This small difference ensures you get a precise fit for all different hand sizes. There is no need for half sizes in the Taylor range. In fact many bowlers find, if they need to come down in size, it is often 2 sizes due to such a small difference between them".

Coloured bowls available in heavy weight only.

As a tolerance is allowed during production, this table is for guidance only.

Please note that Taylor Bowls reserves the right to alter the specifications of products at any time.

Greenz sport shoes are manufactured using one of the world's most popular synthetic leathers - Clarino. Strong and very light, Clarino lets your foot feel naturally at ease; its dense yet microporous, allowing water vapour and heat to pass through. And because Clarino is a breathable material, heat is dissipated in warm weather and retained in cold weather. Easy clean: just wipe with a soft kitchen sponge rinsed in warm soapy water and allow to dry naturally.

The 'Super-Grip' rubber sole with slashed tread and concealed flex channels provide the ultimate safety allowing water to escape without creating an aquaplane effect that can be so dangerous.

TAYLOR TOURNAMENT MEASURES

Designed with help and advice from the top officials and in conjunction with information gleaned from bowlers at all levels of the game.

Our designers took into account modern technology, accuracy, ease of use, quality and value in their conquest for these specifications.

Our measures are manufactured to exacting standards to incorporate a secure measuring mechanism and are housed within a solid colour injection moulded casing. The cord is a fine, flexible, silver nylon coated, multi-strand, steel cable. Common to each model is a ridged base to ensure a secure, non-slip foundation.
