

Renovations, Alterations and Services

Bowls sent to us should be carefully packed in a suitable container(wrapping paper only is not sufficient). Please include all information regarding your service along with your name/address and contact information.

To comply with WBB Testing Regulations, Level Green Bowls submitted for re-testing, or any work involving re-testing, must be in sets of 4.

It is conditional on our accepting bowls for re-testing that if found necessary they will be adjusted to comply with current bias standards without reference to the customer, unless we are previously instructed otherwise.

Composition bowls can be re-buffed and re-stamped, but this will not remove deep scratches or chips. Bowls of our manufacture will have stamps renewed.

We no longer reduce composition bowls of our manufacture as this is not economical.

In cases of bowls being rejected we reserve the right to apply a handling charge.
